

A Day in Your Life with **SafeUpdates**

Your Morning Routine

You're set up for a productive day! Last minute updates or changes are the least of your worries.

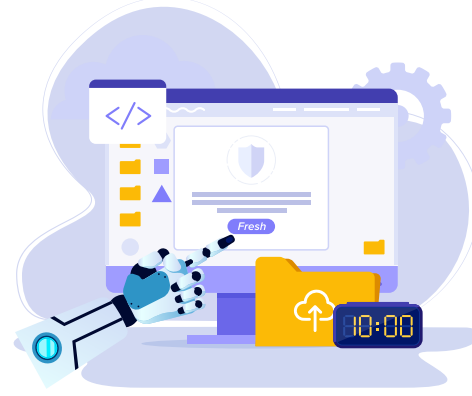

Auto-detection of Updates

SafeUpdates looks out for new updates: core, themes & plugins (including premium ones) while you go on with your day.

Meet your day head on

Jump directly on your scheduled work for the day. You efficiently check off tasks from your to-do list, one after another!

Automated Backups

SafeUpdates always takes a fresh backup before any updates, so your site & data is safe to roll back to.

A notification stops you in your tracks

Scheduled updates will take care of that, or hit the on-demand update any time you want SafeUpdates to cautiously perform an update for you!

Staging & Visual Regression Testing

SafeUpdates compares screenshots taken before and after on a staging site ensuring nothing breaks. In case of an issue it'll abort the update and notify you.

Business looks Good

You stretch out and sip your coffee, happy with yourself and your team.

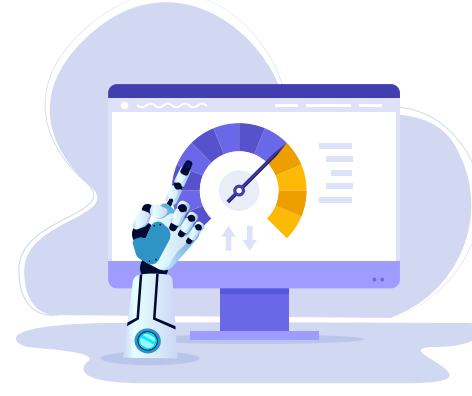

Logs, HTML Checks

SafeUpdates tests before and after for HTML changes. It also checks Browser Console and Network Log for errors as a result of an update.

Oh, time to take the dog out

Coco needs his daily walk, and that you have to prepare for that meeting. Sounds like a plan!

Performance Tests

SafeUpdates makes sure no update slows down the performance of your websites!

You come back to find all updates **Auto-Deployed**

SafeUpdates updates the production application on your selected day & timeslot. Tests again and emails you results. You get back to work, delighted knowing that SafeUpdates does this for you every week.
